

ABS-2D Series cabinets are single-row enclosures for use with network and ACS series annunciators. These cabinets are suitable for both surface mount and semi-flush mount applications. Trim ring applications require a minimum distance of 0.875 in. (22.25 mm.) between the wall and the front of an enclosure.

Available in either black or red, enclosures in the ABS-2D Series include a backbox, a locking door with a LEXAN® window, and two keys. Three knockouts on the top of an enclosure and two knockouts on the sides, bottom, and back provide conduit access.
